Solid Waste Self-Haul/Back-Haul Form

This form is to certify the business or property listed on the application does not have non-organic waste and/or organic waste recycling services provided by the City's franchised hauler, South Tulare Richgrove Refuse (STRR), and instead has arranged for recycling services by Self-Hauling to approved facilities, or Back-Hauling to another self-owned facility of affiliate that recycles/composts materials.

California Senate Bill 1383 (SB 1383) requires that organic waste be diverted from landfills by means of recycling and/or composting. If you need to find recycling facilities, visit CalRecycle's website at www2.calrecycle.ca.gov/wheretorecycle/ for options.

Per the City of Delano's SB 1383 Program Description, the self-hauler must comply with the following requirements:

- Self-haulers shall haul their source separated recyclable materials to a facility that recovers those materials; and haul their source separated green container organic waste to a solid waste facility, operation, activity, or property that processes or recovers source separated organic waste. Alternatively, self-haulers may haul organic waste to a high diversion organic waste processing facility.
- Self-haulers that are commercial businesses (including multi-family residential dwellings) shall keep a record of the amount of organic waste delivered to each solid waste facility, operation, activity, or property that processes or recovers organic waste; this record shall be subject to inspection by the city. The records shall include the following information:
    1. Delivery receipts and weight tickets from the entity accepting the waste.
    2. The amount of material in cubic yards or tons transported by the generator to each entity.
    3. If the material is transported to an entity that does not have scales on-site, or employs scales incapable of weighing the self-hauler's vehicle in a manner that allows it to determine the weight of materials received, the self-hauler is not required to record the weight of material but shall keep a record of the entities that received the organic waste.
